Dear Hiring Manager,

I am a graduate with a Bachelor of Science in Information Technology (Cum Laude) from STI College Pasay-EDSA, eager to launch my career in technology. I bring hands-on experience in web development and a strong foundation in building scalable web applications.

During my internship at the Department of Science and Technology - National Research Council of the Philippines, I developed a comprehensive employee intranet system featuring an admin dashboard, announcement board, and event calendar with advanced scheduling capabilities. Working with React, Laravel, and MySQL, I delivered solutions that improved internal communication efficiency for the research department.

My technical expertise spans modern frameworks including React, Next.js, Laravel, and Node.js, complemented by proficiency in JavaScript, PHP, and SQL. I also hold a certification in SAP Business One: Systems Integration & Architecture, which strengthens my understanding of enterprise systems and business processes.

I am passionate about problem-solving and learning new technologies while contributing to meaningful projects. I work well in team settings and am excited about the opportunity to bring my technical skills and fresh perspective to your organization.

Thank you for considering my application. I look forward to discussing how I can contribute to your organization.

Sincerely,

Janier Kim Anthony D. Esperida
